**It's 4 Kids** playground equipment is an exciting combination range of challenges and fun activities for energy-filled children who love being outdoors and letting their imaginations fly.

Our framework of our equipment is structural and planed timber. This is a more friendly and inviting medium that metal or plastic. The timber is pressure treated to withstand the weather elements as it stands outside. It doesn't need to be sunk into the ground and, therefore can be moved around your garden or to a new home with relative ease.

It is a modular system that has, as it's centre, the tower. From the tower you can add items in the combination that best suits your requirements and budget. The items can be assembled on site making it an ideal do-it-yourself project.

Let your play system grow with your children giving them hours of stimulating imaginative play, alone or with friends, all within the safety of your own back yard.

We would love to assist you in creating a play system for your children. Please call us, we look forward to hearing from you.
